

Mahaojshvi Varenny Swami

Aspiring Data Scientist | B.E (IT) Fresher

+91 92415 01073 | ojshvisharma64@gmail.com | linkedin.com/in/mahaojshvi-varenny-swami | github.com/ojshvi

Career Objective

Motivated B.E IT fresher with hands-on experience in data analysis, machine learning, and data visualization using Python. Proficient in Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Power BI, Excel, and Data Structures & Algorithms in C++. Eager to solve real-world data problems and leverage analytical methodologies to drive data-centric solutions.

Education

The University Of Burdwan

B.E. in Information Technology Current SGPA: 6.89 / 10

Graduation Year: 2027

Burdwan, West Bengal, India

Technical Skills

Languages	Python, C++, SQL
Data Analysis	Pandas, NumPy, Matplotlib, Seaborn, Microsoft Excel
Machine Learning	Scikit-learn (Linear Regression, Random Forest, Decision Tree, GridSearchCV)
Tools & Dev	Power BI, Jupyter Notebook, VS Code, Google Colab, Git, GitHub
Data Structures	Arrays, Linked Lists, Trees, Graphs, Sorting & Searching (C++)

Projects

Insurance Data Analysis & Visualization

- **Tech:** Python, Pandas, SQL, Power BI, Matplotlib, Seaborn
- Analyzed a real-world insurance dataset to uncover actionable business trends in premium pricing, historical claim patterns, and customer demographic groups.
- Performed rigorous data cleaning and processing using Pandas; constructed optimized SQL queries for fine-grained segment-level analysis and data aggregation.
- Created 15+ engineering charts (bar plots, pie charts, heatmaps, box plots) using Matplotlib and Seaborn to communicate analytical trends clearly.
- Built an interactive Power BI dashboard implementing advanced slicers and functional drill-downs focused on age, region, BMI vs charges, and smoker impacts.

House Price Prediction using Machine Learning

- **Tech:** Python, Scikit-learn, Pandas, Matplotlib, Seaborn
- Built predictive regression models including Linear Regression, Random Forest, and Decision Tree architectures to forecast house prices based on physical area, geographic location, and local amenities.
- Executed rigorous feature engineering, handled categorical variable encoding, scaled quantitative features, and tuned critical hyperparameters using GridSearchCV.
- Evaluated machine learning models using RMSE metrics and R^2 scores; visualized feature importance rankings, actual vs. predicted price metrics, and comprehensive correlation heatmaps.

Certifications & Courses

Data Analytics with Python: Proficient in Pandas, NumPy, Matplotlib, and Seaborn | **Machine Learning:** Specialized in Supervised & Unsupervised Learning algorithms using Scikit-learn | **Data Structures & Algorithms:** Advanced problem-solving foundations in C++

Achievements & Awards

- Solved **100+ DSA problems** across LeetCode and HackerRank platforms, showcasing an ability to engineer algorithmic solutions.
- Completed **2 end-to-end data analysis and Machine Learning pipelines** complete with clean source code, documented business insights, and advanced visual graphics.

Soft Skills & Languages

Soft Skills: Analytical Thinking, Problem Solving, Team Collaboration, Quick Learner, Attention to Detail

Languages: English (Professional), Hindi (Native)
